ABOUT ME

Full-Stack Software Developer with a previous background in iSeries AS/400. Passionate about using modern web technologies to make bold ideas come true while working with a smart and diverse team. Always looking forward to giving the best performance and results while keeping a cool, optimistic, and joyful attitude. High sense of organization and attention to detail, always focused on delivering a great and beautiful experience to users and the people in general. In addition, medium-advanced English level, with great enthusiasm to be constantly learning and teach to others if I have the opportunity.

EDUCATION

Full-stack Software Developer - Holberton School. *2021 - Present*

Topics learned:
- System Engineering & DevOps: Bash, Scripting, Networking, Security, Web Architecture, and CI/CD.
- Low-Level Programming & Algorithms: C, Linux & Unix system programming, and Data structures.
- High-Level Programming: React, JavaScript, Python, and Databases.
- Project management: Interpersonal communication, and team collaboration skills.

EXPERIENCE

LinkedIn Web Scraper - Techstar. *October 2021*

Task performed:
- Extracted more than 8000 co-founders profiles from Sales Navigator platform, with all necessary information about profile and their company using Fetch library.
- Stored all previously mentioned information both in Airtable and in the MongoDb Atlas database using libraries as PM2, Mongoose.
- Implemented a totally functional REST API using Express library and was mounted in 2 NGINX servers and a third one was used as load balancer.
- Automatically sent a message to the user via email when the scraping task is completed or if an error occurred.

iSeries AS/400 Developer - ITS Solutions(Colpatria). *2018 - 2020*

Task performed:
- Created maintenance data programs using CRUD, 1 each week or less, depending on quantity of fields and special validations.
- Implemented a complete Foreign Exchange system that was previously created in CitiBank, but in this case using Colpatria new commercial rules, allowing users realize different currency operations.
- Other banking solutions like filters, depurators, reports with RPG, RPG Free, CL and DB2 languages.
